OPORTO POD

Pestana Palácio do Freixo

18-20 MAY 2021

PROGRAM

13h00 - 14h30 Percutaneous mitral treatment: repair or replacement - part 1

Interview - Mitral valve therapy

Imaging analysis

Presentation of device and interview on device selection: PASCAL vs. Mitraclip

Virtual LIVE Case from Clinique Pasteur - Toulouse, France

14h00 - 16h00 Percutaneous mitral treatment: repair or replacement - part 2

Interview - Percutaneous mitral replacement

Imaging analysis

Presentation of device

Virtual LIVE Case from London Bridge Hospital - London, United Kingdom

16h00 - 16h30 Discussion and key messages

16h30 Chillout!

13h00 - 13h20 Meta-analysis of elective coronary revascularization vs medical therapy alone

Meta-analysis of elective coronary revascularization vs medical therapy alone

PCR Clinical Research Fact-Checker: summary of the methodological points of the study

Comments from discussant

Comments from presenter

PCR Clinical Research Perspective

13h20 - 14h35 Revascularisation for chronic coronary syndrome and multivessel disease - Part 1

Welcome and objectives

When should patients with CCS and MVD undergo revascularisation?

Virtual LIVE Case from London Bridge Hospital - London, United Kingdom

How to select the optimal revascularisation strategy in such patients?

14h40 - 16h00 Revascularisation for chronic coronary syndrome and multivessel disease - Part 2

Virtual LIVE case from Clinique Pasteur - Toulouse, France

How to perform state-of-the-art contemporary PCI practice to achieve optimal procedural outcomes?

13h00 - 16h00 **Clinical applications of IVUS, OCT and other intracoronary imaging techniques: practical simulation-based learning**

16h00 - 16h30 **Discussion and key messages**

16h30 **Chillout!**

13h15 - 14h45 **Percutaneous tricuspid valve repair: how to perform it - Part 1**

Interview - The percutaneous treatment of the tricuspid valve

Imaging analysis

Presentation of device

Virtual LIVE case from Clinique Pasteur - Toulouse, France

14h45 - 16h00 **Percutaneous tricuspid valve replacement: how to perform it - Part 2**

How to start a tricuspid interventional programme - My 5 best advice for imaging in percutaneous treatment of tricuspid

How to start a tricuspid interventional programme - My 5 best advice for edge-to-edge repair in percutaneous treatment of tricuspid

How to start a tricuspid interventional programme - My 5 best advice for percutaneous annuloplasty in tricuspid

Imaging analysis

Presentation of device

Virtual LIVE Case from London Bridge Hospital - London, United Kingdom

13h00 - 14h55 **Advanced techniques for complex CTO interventions**

Patient presentation and diagnostic angio

Hemodynamic support for CTO PCI; views from two experienced centres

Virtual LIVE case from University Heart Center Freiburg - Bad Krozingen, Germany

Technical tips and tricks for dissection and reentry; risks in calcified CTOs

Technical tips and tricks for difficult collateral anatomy

Contemporary Antegrade Wire Escalation

14h55 - 16h00 **Complications during CTO interventions**

Case presentations - Vessel rupture: Main vessel/distal vessel rupture; collateral perforatio/rupture (septal/epicardial)

Vessel rupture: mechanisms and primary treatment options

Case presentations - Specifics and risks for CTO PCI in post-CABG patients (atrial tamponade, intra-mural hematoma)

Tips and tricks for passage through occluded SVGs, including "Tattoo technique"

16h00 - 16h30 **Discussion and key messages**

16h30 **Chillout!**

13h00- 14h15 **TAVI: Contemporary indications and techniques**

Virtual LIVE case from Clinique Pasteur - Toulouse, France

14h35 - 16h00 **Edge-to-edge mitral valve repair : contemporary indications and techniques**

Virtual LIVE case from Clinique Pasteur - Toulouse, France

Imaging analysis

Which patients are good candidates for edge-to-edge mitral valve repair ?

Patients with primary mitral regurgitation

Which patients are good candidates for edge-to-edge mitral valve repair ?

Patients with secondary mitral regurgitation
